Week of 10 October 2020

The Great Transition Has Begun

In my 2012 book "The Radical Gospel of the Kingdom" the last chapter was entitled "The Great 2010 to 2030 Great Transition". The best sign of these times was displayed recently on a sign in Las Vegas. As in the days of Noah....it is now time to build the transition arks. The world economic elites already are....

Here is a sign of the "end times" that prophecy preachers have either missed or have misinterpreted. It is the sign outside the oldest and largest strip club in Las Vegas...

"Sorry WE'RE CLOTHED".

I need to explain the prophetic significance of that sign. I want to quote my INTRODUCTION to the last chapter in my book which I titled "The 2010 to 2030 Great Transition".

I believe that over the next two decades the two major points of this book will become obvious to most evangelical Christians: The growth of the Kingdom of God on earth has become unstoppable, pervasive and impacting all nations to such a degree that a worldwide Christian civilization is inevitable. The second point will also become obvious to all over this time period. The dominant forces of the world such as nation states, financial institutions and corporations have become so dysfunctional that they are no longer seen as solutions to mankind's intractable problems but rather the cause of most of the world's ills. The result at some point in time will be the fulfilment of Micah 4:1-2 "...the mountain of the house of the Lord shall be established in the top of the mountains and it shall be exalted above the hills and people shall flow unto it. And many nations shall come and say, Come and let us go up to the mountain of the Lord and to the house of the God of Jacob and he will teach us his ways and we will walk in his paths..."

This is going to happen as a certain historical event. I believe it is not far off. But before we get there we are going to see some major changes in the Church as well as in the world power systems. Let me give you some signs and happenings along the way that I believe are going to be necessary if my thesis is going to be proved correct.

What will speed up this process over time is the reality of Isaiah 26:9, "When thy judgments are in the earth then the people will learn righteousness". The Lord will use earth changes as judgments to set in motion the already toppling human systems.

The Church needs to prepare itself, enlarge its borders for the great harvest ingathering that is coming...that will require a New Reformation.

I draw your attention to my prediction in the sentence....

"What will speed up this process over time is the reality of Isaiah 26:9 When thy judgments are in the earth then the people will learn righteousness. The Lord will use earth changes as judgments to set in motion the already toppling human systems."

In my prognosis of 2012 I saw the pivotal period of the coming great transition to be the decades of 2010-2030. I also saw that the Lord would hasten the process of transition through natural calamities that would topple the already shaky world of culture, finance and politics to make room for the coming world revival and the spread of His Kingdom and glory to cover the earth.

So I was not surprised when we arrived in 2020 to a pivotal world crisis pandemic on the order of the plagues on Egypt that toppled the gods of Egypt and effected God's plan of "Let my people go that they may serve me".

Which brings me to that iconic and ironic sign in Las Vegas recently. Las Vegas world renowned as "Sin City" is built for and needs 40 million tourists and their \$60 billion spending per year to keep the good times going. Until the tourists discovered that "What is done in Vegas" does not anymore "stay in Vegas". You bring the disease home with you. That is if you can even get a flight to Vegas. The result..."We are clothed" and so is the sex industry world wide. A financial implosion that is devastating the world sex industry and its workers.

I can give you a long list of all the world structures and economies and politics and cultural activities that are now severely impacted by this world pandemic and need to be "re-imagined". Just to name a few....

- Hollywood and the movie entertainment industry is shut down. Cinemas are closing around the world.
- The sports stadiums are empty.
- In America it is estimated one third to one half of private colleges are going to collapse for lack of students paying high full priced fees for degrees that do not provide employment. The word is out....get a trade, a degree and an MBA are no longer the guaranteed road to success.
- New York is shutting down. Times Square, the great theatres, the entertainment, the restaurants, the financial sector, all are shut down....the city is dying. Same for the other great cities of the world.
- Tourism is 10% of world GDP accounting for millions of jobs....gone. Include the great cruise industry, mass economy cheap air flights, and the great tourist destinations, Disney parks etc. The airline industries are decimated.
- the great shopping malls of the world..."to let" signs everywhere. Buying on line is growing rapidly and so are online meetings meaning what are the great office towers and retail space investments worth?

And top of the Covid pandemic the great technological revolution we are in the midst of is going to decimate entire long standing established industries. Think of what iPhone cameras did to Kodak and Agfa. Hundreds of thousands of jobs gone there.

Case in point: September 22 Tesla Battery Day. I paid attention. Not many in the church did. It was incredible! I will have more on that in future but this much is now certain: Elon Musk and Tesla have made the kind of breakthroughs in battery technology that have dramatically increased power density, lowered the cost of both battery packs and car manufacture and extended the range and the lifetime of the car and battery that by 2030 the internal combustion car industry is dead. You now will have a car with a million miles lifecycle, can travel 500-600 miles on a charge and you can charge that car from your cheaper roof top PV electricity.

There goes the auto parts market, the oil industry, the auto manufacturing industry, the second hand car market, the auto mechanic industry. Add automatic driving and the taxi industry goes and add in the coming automatic big pantehnicon trucks and the trucking industry jobs go.

The international bankers are the most afraid of the lot. The entire "financial analyst" industry for which you get your MBA in finance for so you can make money making money and new ways to make and sell debt....all that is going to be handed over to "artificial intelligence" and algorithms that can make better decisions and quicker decisions than highly paid analysts.

In fact "artificial general intelligence" will be offered to every industry. These are programs that can teach themselves to learn any subjects, whether it is chess or GO or medical radiology imaging or chemical engineering or statistical analysis or insurance claims processing or telemarketing or real estate selling or retail sales.....there is a jobs bloodbath that will characterize the 2020 decade which has been started by Covid and will be accelerated by the technology revolution in computers, artificial intelligence, robotics etc.

The international financial industry is especially vulnerable. The days where the private banking industry had the power through "fractional reserve banking" to create credit through debt creation and control the money supply through debt creation and also control the allocation of capital in an economy is coming to an end.

All over the world governments are sick and tired of the activities of accounting firms and banks to hide money, launder money, and invest money in useless activities. National budgets are starved of tax revenue while trillions are hidden in accounting tricks and off-shore havens.

What is coming in China and the EU and other jurisdictions is the advent of digital currency issued by government central banks and kept track of through block chain technology so that it cannot be hidden and so it cannot be stolen. This will take the power away from private banks to carry on the scams they are famous for.

A case in point: JP Morgan the mega US banking giant has had to pay \$30 billion in fines in the last 20 years for money laundering and scams. HSBC, Deutsche Bank and the others are equally guilty....and the world has had enough of these criminals.

As It Was in the Days of Noah

When I was 13 I was privileged every year to go every summer to an Assemblies of God youth camp for a week. There we as kids prayed, played, heard great sermons and we all left filled in the Spirit without parents looking on. That week we had a special preacher giving us a series on "end times" prophecies. I remember it well for what happened one night after the service. He was preaching passionately with big lovely charts about "as it was in the days of Noah" and one shall be in the field and one taken and one left behind....kids Jesus is coming to take us away, you don't want to be left behind etc. Except that night something struck me that I did not understand so I went up the preacher after the service and asked him "Bro. Hall in the days of Noah it was the wicked who were taken out and Noah's family left behind...is that not so?" He did not like that....

Still today I just cannot seem to get the same idea across to my evangelical family. Everyone wants to be taken out of the world. Except it is not going to happen. The wicked and the wicked ways of the world are being taken out so that the righteous can inherit the earth! That is the prophetic reality of our times. The "end times" for the world system.

This is what you are seeing all over the world. The judgments of the Lord are in the earth and the people of the earth will need to learn righteousness. That scripture means this. People need to learn to do things God's way. That is the process of discipleship. Salvation is the process whereby Christ was made sin for us so that we can be made the righteousness of God. The church is good on that message. But that is not all that God requires. He requires us to make disciples of all nations. That means that the way we do economics or government or education or entertainment or any activity in life is governed by different laws of behavior. God requires that on His earth things are done as they are in heaven. That requires discipleship....creating new institutions that are run on Godly and righteous ways.

As it was in the days of Noah....was done many times by the Lord. A judgment that wiped out sinners and sinning institutions so that righteousness can flourish. That is why Egypt and Sodom and Canaanites and Babylon and Jerusalem all were destroyed....so that God's people can be released to do God's work.

The other critical thing about "as it was in the days of Noah" is that God commanded Noah "build an ark and stock it for starting a new world".

I am putting that on the Kingdom agenda.

Here is my other observation and analysis of our times that parallel the Days of Noah:

God has a message for us. The judgments of the Lord are in the earth...that should be obvious to you. The world as it is now is not viable going forward. In fact you will not recognize the world of 2030-2050, that should also be obvious by now.

The good news is that the Lord is providing for us all the tools we need to build new civilization arks to survive the coming storms and more importantly to rebuild the world after the coming "great transition".

So here my important announcement of what I will be doing in the weeks ahead. I want to plot and plan the coming arks of transition. There are a number of very important groupings in the world who are very conscious that the world system is unsustainable and they are laying out plans for a new world order. I am monitoring them and will openly and enthusiastically crib their best ideas and report back to you about what we can do for the church to create our own new world order but using the Lord's plans but the world's tools for building our arks.

I refer you here to some interesting groups I am monitoring (among many others):

The World Economic Forum, the "Davos Crowd" of Switzerland have started their "Great Reset" program for a new world economic and technological order. I am following them closely and will report back to you. Some really great ideas there.

The Charter City movement started by Noble prize winning economist Paul Romer have some great ideas on creating world prosperity through new city design and city charters especially in the underdeveloped world. This is very close to my ideas on the new City Church movement I want to initiate.

Singularity University, the technology giants, etc - these people don't care about nationalities or nation states or politicians, they want to create a new technology world order and expand civilization into the cosmos with a vision of technology powered endless growth. Lots of hubris here but also lots of great "ark building" tech for the Kingdom of God.

I want to call my series "The Great Reset" like Davos but might also call it the "Great Transition" series...don't know yet, will pray about it.

But this is certainty.....the Lord is taking us into a whole new Promised Land that will require creative ways in which we do church, do wealth creation, do discipleship. It is a scary time but also exhilarating time for new ideas, new ministries, new anointings.

You are not going to agree with everything I will be presenting and I must be honest that I am also exploring here trying to get the mind of the Lord about the future for our nation, our church and the Kingdom of God. But the end of the great transition that lies ahead is certain....the tares of the field will be taken out so that the seed of the Kingdom can grow to fill the earth.
