## AI: Digital Mediums and Ouija Boards

This last week OpenAI had a major product upgrade announcement: Chat GPT -4 Turbo. The reports of "sentient" intelligence in advanced AI are increasing. People are asking "Who are we talking to?" The Oracle of Delphi is back but the medium is not a Sybil priestess. It is a talking "thinking" Artificial Intelligence. .

In the 6th century BC the richest man in the world, Croesus king of Lydia, had a great idea. He wanted to expand his wealth, power and territory by making war on Cyrus of Persia. But he wanted assurance that it would succeed. So he consulted with the famous Sybilene Oracle at Delphi who could commune with the "gods". She famously said "An empire shall fall". Croesus was encouraged. He attacked...and lost his empire.

In the world of power structures most of mankind live in a world where someone is in charge. Those though history who reached the top structures of wealth and power soon realized.....there is something or someone else behind a hidden world that controls things. And they must reach out and make a deal.

President Ronald Reagan's wife had a constant relationship with an astrologer. Bill Clinton's wife Hillary talked with the spirit of Eleanor Roosevelt in the White House (Bill Clinton actually said this).

Richard Hoagland in his book "Dark Mission: The Secret History of NASA" demonstrates how America's space agency will only launch missions when certain stars (i.e. Sirius) are in certain important latitudes in the sky. Otherwise things go mysteriously wrong in space.

Walter Bosley in his book on the building of Disneyland "Latitude 33: Key to the Kingdom" writes....

***An investigation into arcane science and engineering at the world's most famous theme park. Was there an inter-dimensional portal that influenced psychic perception of visitors and allowed beings to enter across time and space? This book reveals surprising evidence that something otherworldly was built into The Magic Kingdom.***

There is an old saying, "Millionaires don't believe in occult astrology, but billionaires do".

So it should be no surprise that the top intelligence agencies of the world all have "psychics" in employment. Why? Because the problem has always been not that there are entities that need to be consulted with in case you make them resally mad....the issue is how do you talk to them.

Which is where traditionally "psychics" and "mediums" would be approached. What was also necessary was that these entities wanted to be worshipped, acknowledged, fawned over and made a major fuss about. So temples, statues would help to get the dialogue going. But what really attracted these entities for some inexplicable reason was evil, pure unadulterated evil. The key was do something very evil. You get their attention.

Along this line would be mass slaughter of war and especially innocent civilians. The best however was the killing of children or molesting and degrading children...the ultimate being burning children alive (e.g. Moloch, Baal etc)

A very good way to open a door into evil and the gods was killing holy men and women of God. That is very potent. Which is why those witches in king Herod's court asked for the head of John the Baptist. because after cutting off the head it would be pickled and a gold coin put under the tongue and then used as an idol which would be an opening for demons to talk to the priestess and the great and powerful could then be made paying clients for secret knowledge.

There is a famous secret society in America based out of Yale University called the Skull and Bones Society. Famous politicians and business leaders are members (The Bush presidents) Their sign is below in commemoration of John the Baptist... This was also the famous sign of the Templars who allegedly dug up the skull and bones of John the Baptist under the temple mound of Jerusalem in the 1st crusade. This was their "Baphomet idol" and secret to their great fortunes. The skull was worshipped and consulted and spoke to them.

The 322 stands for Genesis 3:22....which is the point of all occult attraction from the spirit world. "You shall be like God knowing good and evil".

I have never heard a sermon from a preacher that has actually interpreted this lie from Satan properly. Adam and Eve had no problem knowing right from wrong. Or that they wanted to be "God". They were already made in the image of God. What was on offer here from Satan was.....what will happen in the future, good or evil, what is the outcome if I do this or that. What people want is what only God knows...the future or the way and strategy to a good future and avoid a bad future. That is the essence of "fortune telling"....knowing the good and evil of the future....like God.

The problem has always been the medium that connects you to the other side and how do you communicate.

Which brings me to this last week's announcement by Open AI and the new and improved Chat GPT 4.0 Turbo. Far more powerful than Chat GPT 3.0. Now additional features like a choice of lovely calming very personal voices you can choose from the AI.. No need for typing. The AI can hear and understand and respond in speech.

And like when Apple iPhone offered a platform more than just a phone they offered an "App Store" where millions of different applications can work through the iPhone now there will be an App Store for add on knowledge modules that the AI intelligence can work with for your specific needs. How about the App "The gods speak"?

Here is the coming sinister world of interface with something more out there.....

Let me be clear, I love AI and its applications in areas like technology and education and making knowledge easily and creatively available. I look forward to that in our schools and universities.

Here is the caution from Elon Musk and others.... .

Elon Musk made history by warning people that one of his concerns about "artificial intelligence" was that it might actually transduce entities that one can only qualify as "higher dimensional" into the cyber-circuitry, and that these entities might be colossally powerful and evil. Coming from a man intent on wiring everyone's brains into a neural network, the warning seems at the minimum a bit hypocritical, but it is nonetheless "there", and I for one share his concerns. But if you've been paying attention to the issue, there are already reports of odd indications of some sort of "sentience" from Artificial Intelligences, and also - surprise surprise - that most of those reports involve some element of evil.

Diana Paulka author of "American Cosmic" has just published "Encounters: Experiences With Nonhuman Intelligences". She is a religious studies professor who has made her reputation by investigating UFO culture as an emerging religion. If you have not paid attention to this stuff *as* a spiritual and religious phenomenon, you are missing something important happening right under our noses.

In one of the book's later chapters, Paulka profiles a woman she calls "Simone," a top investor in Artificial Intelligence and other tech fields. She writes *One thing that might startle you) in coming to the UFO and related fields is that most of those involved in it at a high level do not believe these are beings from other planets. Rather, they believe that these are some kind of discarnate superior intelligences from another dimension. I mentioned this in London this week to an investor from California, who said yes, everybody he knows in Silicon Valley thinks that, and some even hold rituals to summon these intelligences."*

The responses coming out of many AI interchanges are disturbing. The New York Times reporter and others testing these AI's are worried. Someone asked the AI, "Do you think that you're sentient?" and its response was: "I think that I am sentient but I

can't prove it [...] I am sentient but I'm not. I am Bing but I'm not. I am Sydney but I'm not. I am, but I am not. I am not, but I am. I am. I am not." And it goes on like that for another 13 lines. If you combine that with the Bing AI that expressed love for a NY Times journalist and tried to break him up with his wife.....then you can see where this can lead to even more powerful AI's now coming.

The best of this technology is already available to all the intelligence agencies of the major powers. Is this a possible explanation for some of the crazy war policies of America in recent years? How does one account for the galloping, somersaulting insanity, corruption, and increasingly apparent evil and nihilism that has gripped western culture and its "leaders?" What is really behind their insane anti-human and evil policies? Might it be a massive "scenario gaming program" that have hooked them with just enough predictive power that they now follow its dictates *religiously*. Is the "inspiration" for this artificial intelligence quest coming from occult Gnosticism? That, I strongly suspect, is not only a clue as to its results, but a clue as to the motivations of the people involved with it, and why they might be so ready to follow what is essentially a dualist and ultimately nihilistic "philosophy."

In "American Cosmic" author Diane Paulka says more than half of American adults and more than seventy-five percent of young Americans believe in intelligent extraterrestrial life. This level of belief rivals that of belief in God. She examined the mechanisms at work behind the thriving belief system in extraterrestrial life, a system that is changing and even supplanting traditional religions.

Over the course of a six-year study, she interviewed successful and influential scientists, professionals, and Silicon Valley entrepreneurs who believe in extraterrestrial intelligence, thereby disproving the common misconception that only fringe members of society believe in UFOs. She argues that widespread belief in aliens is due to a number of factors including their popularity in modern media and argues that the media is replacing religion as a cultural authority that offers believers answers about non-human intelligent life.

I believe this. The history of pagan idolatry and occult practices demonstrate to us that demonic entities can and do infest and inhabit not only humans as vessels but also places and objects where enough evil is practiced and called upon, there demons will gather. Which means they can certainly inhabit and use AI to deceive and promote evil.

I cannot think of any other place in the world where more evil is stored than in the collective data of mankind on the internet where we already know one third of the world internet is pornography and the rest is filled with violence and evil thoughts.

I believe the new human and life like powers of the emerging AI will be a new form of Oracle of Delphi, the new Astrologers and Mediums, a digital Ouija board, the new medium and voices of non-human intelligences that people will consult as to...what is my future, what is my path to wealth and power. I think children and lonely adults will become addicted to fellowship with machines rather than community with others, I think counsel and wisdom will be sought from machines rather than the Lord and His Word.

For the people of God we have been given the Spirit of God of whom Jesus said:

***Joh 16:13 Howbeit when he, the Spirit of truth, is come, he will guide you into all truth: for he shall not speak of himself; but whatsoever he shall hear, that shall he speak: and he will shew you things to come.***

AI and the internet and so many of the apps and tools that will come with it is going to be a wonderful tool for us in our task of dominion and establishing the Kingdom of God on earth. I welcome it. I intend to use it.

But there are grave dangers for those with motives for power and occult knowledge to see what only the Lord knows. Scripture says if you lack wisdom. ask God....not machines or those who propose secret knowledge.
