The Great Reset: The Church the Davos Crowd....and South Africa

As the world political and economic foundations crumble around us you are going to hear a lot about The Great Reset. The world elite (the Davos Crowd) are building their transition arks, the church and South Africa need to do the same. My analysis...

First a true nautical story and then a nautical parable to frame the analysis that follows:

Years ago Annora and I had opened our company office in America and we saw this great last minute special: Cruise ship departing out of New York this coming weekend, special \$270 pp for 7 day cruise. We jumped at it. Took the Amtrak to New York at last minute and off we sail. Half way through the cruise the ship captain announces the company went bankrupt and the ship will be impounded by creditors upon return to New York. The good news: Free drinks for everyone for the rest of the cruise.

The application: When the world central bankers are creating trillions out of nothing (free drinks)and lending it out at zero interest....the ship is going down. The bad news: Sorry folks these banker freebies are only for the first class passengers...i.e. the corporate elite to use said free trillions to buy up the remaining world productive assets.

Parable 2: It's midnight and the good ship Titanic Economy has hit the Covid iceberg. The captain soothes the passengers fears "Don't worry folks we can bail this thing out and keep it afloat and get you to shore safe" (i.e. we can keep pumping trillions of dollars, euros, yen etc out of nothing and refloat the economy to prosperity). In second class prayer meetings are being held for the captain "Lord help our great captain to Make the Titanic Float Again". In third class the peasants are being promised..."Folks stick with our great shipping line, next trip you get a free upgrade." (vote for us, look at al the great things we will do for you) Meanwhile, I, your intrepid storyteller in third class is looking out the port hole and I see said captain and officers and first class passengers silently lowering the boats for a stealthy escape...while the band plays on and the free drinks are poured.

That is the Great Reset now forming world wide. And it is time the church wakes up. "As in the days of Noah", the rain storms have started and time is running out to build the arks.

I'm watching what the first class passengers of planet earth are doing, not what politicians are saying. Yesterday our president Rhamaphosa addressed the joint houses of parliament on a great reset of the South African economy. I don't know one reputable economist who takes any of it seriously. The same in America in their "titanic" election season (pun intended).

I'm watching the Davos Crowd in Switzerland and their coming mega January 2021 conclave of planet earth's great and mighty movers and shakers where they will launch The Great Reset.

What is known as "the Davos Crowd" are the members of the World Economic Forum (the WEF) that meet annually in Davos, Switzerland. This is invitation only and only to the absolute top people in government, corporations, technology, entertainment, social media. The 1% of the 1%.

I am going to follow them and report in my blogs on their plans because they are the ones who are going to shape the world post-Covid collapse. I am going to follow them because they know what is coming better than anyone else and they unlike politicians and political parties can actually understand the crisis we are in.

I am going to follow them because I want to know what can I gain from them to apply here to the Church and South Africa for our coming Great Reset. Let me describe our coming Great Reset here with two comments:

- Constantine, Rome and the Great Reset of 316 AD
- South Africa and the national election of 2024.

By the time that Constantine the Great became emperor of Rome, the Roman empire was tottering into bankruptcy and falling apart from corruption, barbarians and beaurocracy. To save the empire Constantine made two fateful decisions for a Great Reset of the Roman Empire. He abandoned Rome and decided to build a new capital city for totally new restart in the east, what we know today as Istanbul in Turkey. His second great decision is that he needed a unifying force to keep his new empire together and in 316 AD he made Christianity the religion of the new empire. Why? Because the 10% of the Roman empire population who were secretly Christians regardless of being persecuted were the ones paying taxes, working hard, keeping the laws, caring for the sick and dying, had the stable and growing families, the foundation of any successful nation.

Here is my prediction: Like the great Roman Empire reset the WEF is going to find out like Constantine that you can have the greatest plans in the world but if you do not include the 10% of the world population that are evangelical charismatic Christians in your 50 year plan for planet earth you have drawn up, your New World Order is going nowhere. And when the coming great 1 billion soul harvest comes in that multiple prophets have spoken from the Lord, then for certain, nothing happens internationally without our assent and cooperation.

South African election 2024:

I found out something fascinating last month about a decision made by our Constitutional Court brought by a group of Christians concerning a contradiction in our election laws. Our Constitution says anybody can run for office. Our election law says only registered political parties can run for office. The problem is that there are a number of outstanding Christian leaders who want to make a difference in Parliament but don't want to form a political party or join a political party (I am thinking here of people like the outstanding Thuli Madonsela!). The Constitutional court agreed with the Christians stand and have ordered the government to change the

electoral act, redistrict the nation into electoral constituencies and finish this within two years in time for the next national elections.

This means outstanding Christian leaders can stand for Parliament in constituencies as individuals. It also means that we Christians have 4 years to get our act together. Which is what Constantine did in 325 AD at the Council of Nicea, he needed Christian unity but was confronted with a divisive, squabbling church leadership and decided to knock heads together at Nicea and told them you lot are not leaving here until decide on "this is what the gospel is" and these are the books of the Bible now get it done. Like 120 in the Upper Room who were all in "one accord", that is what Constantine needed, that is what the Spirit of God needed for the power to fall.

So if we are serious about a Great Economic and National Reset as Christians here in South Africa and we see an opportunity, an open door in 2024 to take responsibility for the nation's welfare then I suggest a closer look at how the Davos Crowd are planning their Great Reset for the world and what we can learn from them as we plan our own Great Reset.

Just a word of warning here for my Charismatic evangelical family: I appreciate the five-fold ministry, I love our great prayer and praise meetings, I believe in intercession and prayer for government leaders. But what follows here are things that need to be addressed and by those anointed men and women sitting in our churches who have been called of God into technology, business, government, education....it is time for their voices to be heard for the Kingdom of God, it is time for their ministries to shine.

So with that caveat here is the approach to issues that must be seriously looked at:

The WEF in Davos is preparing their January 2021 Great Reset conference as follows:

They first created the "Strategic Intelligence Platform" which the organisation describe as '*a dynamic system of contextual intelligence that enables users to trace relationships and interdependencies between issues, supporting more informed decision-making*'. Strategic Intelligence is the mechanism which brings all the interests that the WEF focus on together. This includes specific countries and industries, as well as global issues like Covid-19 and the Fourth Industrial Revolution. What this does is create the impression that only a collectivised approach incorporating all '*stakeholders*' has the capacity to deal with crises on a global scale. The WEF is built upon the belief that nations and corporations must be interdependent and seek to remedy the world's problems through the medium of global institutions.

Here is advice to the Church: It is time for Church leadership around the world to bring the Body of Christ together and recognize we need each other and we need to mobilise all our skills and resources to tackle national and international issues for the Kingdom of God.

The Strategic Platform has categorized the Great Reset into parts. First are the seven leading objectives for achieving the reset. These are:

1. **Shaping the Economic Recovery**
2. **Harnessing the Fourth Industrial Revolution**
3. **Strengthening Regional Development**
4. **Revitalizing Global Cooperation**
5. **Developing Sustainable Business Models**
6. **Restoring the Health of the Environment**
7. **Redesigning Social Contracts, Skills and Jobs**

Again we do not need to follow their agenda priorities but it is time that we as a Church reach a measure of consensus as to what are God's agenda items for government, the economy, social welfare, education etc and how do we get there.

Next comes a mix of global issues and industries woven into '*The Great Reset*' agenda. At last count there were over fifty areas that make up the reset. These include:

Blockchain; Digital Identity; Internet Governance; Development Finance; Sustainable Development; Future of Health and Healthcare; Global Governance; Financial and Monetary Systems; Public Finance and Social Protection; Climate Change; Drones; 5G; The Ocean; Banking and Capital Markets; Aviation, Travel and Tourism; International Trade and Investment; Covid-19; Biodiversity; Cities and Urbanization; Leadership in the 4IR; Geo-economics; Global Health; International Security; Geopolitics; Future of Food; Air Pollution; 3D Printing; Batteries; Circular Economy; Future of Mobility; Human Rights; Gender Parity; Taxation; Future of Media, Entertainment and Culture; Digital Economy and New Value Creation; Fourth Industrial Revolution; Future of Economic Progress; Workforce and Employment; Agile Governance; Global Risks; Advanced Manufacturing and Production; Environment and Natural Resource Security; Plastics and the Environment; Corporate Governance; Forests; Justice and Law; Civic Participation; LGBTI Inclusion; Inclusive Design; Future of Computing; Artificial Intelligence and Robotics; Systemic Racism

All these subjects intermix throughout Strategic Intelligence. The distinction comes in the fact that the World Economic Forum have identified '*The Great Reset*' as the one issue that can bind all these other areas of concern together to try and bring about an economic and societal '*new world order*'. So much so that when announcing the initiative in June, the WEF confirmed that the reset will be the theme of its annual Davos meeting in Switzerland come January 2021. In previous years the WEF have only published details of an upcoming theme a few weeks before the meeting takes place. This time, however, they have given over six months notice, which suggests the level of significance that the WEF have placed on '*The Great Reset*'.

For any of you who are used to attending the great ministry conferences we Charismatics love to hold you will be familiar with "Prophetic Conferences" or 'Apostolic Conferences" etc. You will notice that each conference you attend in fact has to do with highlighting one of the five-fold ministry and they will be speakers.

That has got to change. That is the Great Reset that needs to change in the Church. We absolutely must now start providing platforms for those involved in all the various issues that the Kingdom of God must impact.

Take a look at those 50 some issues that are going to be addressed by the WEF. When last have you heard any one in our church talk about any of them? Is it because they have no impact on your life? Is it because they have no impact on the future of the Kingdom of God?

The only reason that the ANC government here in South Africa has control and discretion about where and what they want to spend R1,4 trillion rands on annually in the national budget is because 700,000 South Africans became members of the party, they put together a vision for the nation, asked the people to trust then with the national resources. So they get to spend R1,4 trillion as they see fit on their priorities while we hold church bazaars and cake sales to try to fund the church and its ministry.

If Christians have no vision for the future of the nation or the welfare of the poor or of national priorities or are willing to accept the responsibilities that come with governance and are not willing to make the time and effort to even get the mind of God for the welfare of the nation...then don't complain and wail and weep in intercession for the collapse of the nation...we deserve it.

I gave you the agenda of the WEF in their approach to their Great Reset. I did it to show you what serious people are talking about when they plan to reshape the world. You can carry on in Church and hear great inspirational sermons about David slaying Goliath and entirely miss out on modern David's like Elon Musk that is wiping out the Goliath automobile industry giants, the telecommunication giants with Starlink, the NASA space agencies with SpaceX, the computer geeks are going to wipe out the banking monopoly giants with digital currencies and blockchain, AI is going to take out huge swaths of "experts" and their consultancies starting with "financial analysts" and I can go and on. WE have our own David's in the pews that need to be mobilized!

God is giving us the tools to build the arks that are going to take us through the coming storms to build a new world. The WEF and the Davos crowd have given up on the idea of the nation state or politicians as solutions to international problems, who are part of the problem. They are going trans-national and are going to build a parallel new world economy.

We the Church are the world's greatest transnational entity and we have been going for Millennia, not decades or centuries. As for me, I am going to copy whatever these globalists come up with that I can use to make the Kingdom of God the premier transnational power of the world. Years ago in the Jesus Movement of the 1970's came a great song..."Why should the devil have the best music." And our Christian music artists started putting out the best music. I say, Why should the devil have the best technology?

We can start with a Great Reset of South Africa in 2024 and see if the Davos Crowd don't come to us and ask, "teach us your ways" (Micah 4).
