The Coming Iran War Disaster: A Background Briefing

President Trump has sent a letter to the Ayatollah Ali Khamenei leader of Iran giving them 2 months to settle with America peacefully or by devastating force. Iran will not comply. It is time to analyze the unthinkable. What does “end times” theology look like without Israel?

All across the world there are signs of nations preparing for a major US/Israel attack on Iran.

- America is positioning military forces forward. Two new carrier battle groups are heading for the Gulf region. Long range B-2 stealth bombers are flying into Diego Garcia air base in the Indian ocean.
- In Israel long range jet fuel tankers are being positioned so that their attack aircraft can do long distance air refueling for a strike on Iran. America has delivered several thousand 2000 lb bunker buster bombs to Israel.
- In Europe Poland is conscripting every adult male for military service.
- In France the government has ordered all French out of Iran. The French government has also started to distribute a 20 page survival manual that instructs citizens what to do if a full blow war erupts.
- In the Baltic states they are constructing a massive defense line of six hundred bunkers, tank ditches and rocket systems.
- In the UK special forces have been put on high alert.

Is Donald Trump bluffing?

The recent air bombing on the Houthi's in Yemen seem to indicate America is serious. The US sec of defense and Trump both have said that Houthi attacks on shipping in the Gulf harming Suez Canal shipping are from now considered to be an Iranian sponsored action. This means that Houthi's of Yemen are an extension of Iranian war attacks. This is what America claims a “cassus beli” ...a “cause for war”. And therefore Iran has been given 2 months to agree to demilitarize, stop and dismantle all nuclear processing, hand over all enriched uranium.

Iran will refuse. That is my analysis and others as well. Then what?

The question then arises with two points to consider:

- Can Iran defend itself from an Israeli/American air attack?
- How much damage could Iran do to Israel in a retaliatory attack?

I would assume that since Iran supplies China with 30% of their oil imports and Russia signed various pacts with Iran last year as partner these two nations must have supplied Iran with sufficient defensive capabilities to cripple whatever comes flying in.

The real question for us to consider is how much damage can Iran do to Israel? Can Iran destroy Israel in a retaliation attack?

My research analysis says yes and quite easily in fact for Iran with its present missile and drone capability to destroy Israel. It just depends on what they target.

Let me say why. When people talk about Iran building a nuclear bomb that threatens Israel they are totally missing the real threat. The real threat was identified last year by a Major General of the Israeli Defense Forces who said if the electricity supply of Israel was destroyed then Israel ceases to exist as a nation 72 hours later.

So for Iran instead of causing national radiation poisoning of the land with a nuclear bomb that would destroy any hope for a Palestinian state....just turn out the lights. How?

The problem for Israel is that it is a really small space. And 70% of Israel's electricity comes from gas powered electric utilities. And that gas comes from just three offshore gas fields the Tamar, Leviathan and Karish fields. From these there are only several giant pumping platforms in the sea that send the gas ashore. Those gas rigs in the ocean are all that Iran needs to take out and Israel is fatally crippled.

The response might well be wait a moment, what about Israel's "Iron Dome" defense system? Last year in April and October 2024 there were two drone and missile exchanges between Iran and Israel. Each sending a message of their capability. What was the result?

The public message was Wow Israel took out almost all of Iran's drones. Correct. Iran sent waves of over 300 drones that depleted most of Israel's Iron Dome defensive missiles. But something very dangerous also happened. After sending out their waves of cheap drones Iran then sent a number of their ballistic missiles to the target they really wanted to hit.....In October of 2024 they sent 200 ballistic missiles onto the Nevatim and Tel Nof air bases in the Negev as well as Israeli intelligence centers. 20-32 missiles got through to hit the runways and buildings. And these are some of the most heavily guarded Israeli military bases.

Iran is fully capable of launching not drones but hundreds of ballistic missiles to target and take out Israel's offshore gas pumping rigs. And the other 30% of Israel's power generators working on coal.

If they did that there would be a terrible reprisal. But Iran is a huge and widely dispersed nation. They will survive. Israel will not survive a national destruction of its electricity generation.

Why the existential threats now? Why drive Iran into a corner now? Why gamble the destruction of the Middle East now? For what purpose? Surely this is all bluff?

Let me give you several reasons to consider why the entire “end game” of the Middle East power struggle is looming.

Firstly is you need to realize the tragic situation that Israel is now in. They just cannot carry on.

The Oct 7 Hamas attack and the ensuing Gaza and Hezbollah Lebanon war and the West Bank uprisings are proving to be 18 months later destroying the very fabric of Israel’s social cohesion and economic survival.

Israel’s military defense is based on quick 1-2 week intensive wars. Not 18 months of full scale military mobilization. The conscripts to the IDF are exhausted. The nation is divided to the brink of civil war between the religious half and the secular half of the population. Netanyahu’s ruling coalition is a Torah Zionist coalition who want to re-establish Torah law in the nation with no two state solution but ethnically cleanse Gaza and the West Bank. The other half are non religious Ashkenazi Jews who never bought into all this “God’s People” rhetoric.

The non-religious Jews are your high tech start up nation entrepreneurs and business leaders. And they are exiting Israel by the hundreds of thousands. Back to America or Europe and even the original Russian Jews back to Russia. The idea that Israel was to be a safe palce in the world for Jews is now an illusion. The safest place in the world for Jews is not Israel. Probably America..

Consequently the economy is in shambles. No tourists. Israel needs to borrow billions to pay its war costs and government costs and social obligations. It cannot carry on for much longer. The economy and military are nearing the end. And there is no political or economic or military solution in sight.

Hence it is time for the “end game”.

Donald Trump has an economic solution for the region. In fact a very bold plan that has the backing of the Saudi’s the UAE and other Gulf states. Here is what I have managed to piece together:

The center piece of the economic plan is the Ben-Gurion Canal:

- This would be a competitor to the Suez Canal. It would connect a new harbor on the Mediterranean Sea where Gaza is now through the Negev desert to the Israeli Port city of Eilat on the Red Sea.
- The Canal would be 50 meters deep (10 meters deeper than the Suez) and about 200 meters wide. And about 250 kms long. It would be constructed with rock and cement walls and not sand banks like the Suez.
- It will be able to accommodate very large cargo and military size aircraft carrier ships. And therefore much safer and quicker for international shipping.
- The Saudi's are very keen on this project They are constructing their \$500 billion NEOM city project close to the port of Eilat to turn NEOM into a major shipping logistics handling port much like what Dubai has done.

Now you know why Trump has been talking about turning Gaza into a hotel, tourist and international business centre. That would need an economic justification...which is what the Ben-Gurion canal would provide.

But what about the people of Gaza, where are they to go? Well that is where the UAE and Egypt comes in.

In February 2024 the Emirati Sovereign Wealth Fund made a major \$38 billion investment into Egypt. They bought a large property on the coast of Egypt between Cairo and Libya in isolated but pristine portion of the Egyptian coast called Ras El-Hekma a 170 square kilometers of pristine coast 360 kilometers from Cairo.

Their stated plans are to invest \$150 billion into world class infrastructure, port, high rises, business and factories and tourist development. That is what the plans state.

I believe it is the ideal place for everyone in the Middle East to finally find a place to relocate all the 2,2 million Gaza population that prevent the development of the Ben-Gurion canal and development zone.

Obviously Egypt does not want 2 million Palestinians. But Egypt is desperate for continuing American Saudi and UAE financial support.

But why the haste by Donald Trump? Why risk so much right at the start of his "no more wars" presidency

My analysis of his high stakes gamble.....,

I once asked a very ardent Dispensational Christian Zionist, a very good brother in the Lord, What would you do if Israel were somehow destroyed? His reply: 'I would tear up my Bible because I could not trust any prophesy in it.' Meaning for

him there is no Second Coming of Christ if there is no Israel for Christ to return to.

Donald Trump and his political strategists know this theology. He knows his voters and he knows who gave him the deciding votes to win the presidency.

People overemphasize the power of the “Jewish lobby” in Trump’s support. Yes there are powerful and wealthy Jewish oligarchs in his support and in his cabinet. But American Jews overwhelmingly vote for the Democrats .

Trump won his presidential election with 77,303,568 votes.
Kamala Harris got 75,019,257 votes..

Donald Trump won by a slim majority because of what is known as “high propensity voters” turning out for him. That means highly motivated voters. At least 20 million of his votes came from charismatic/Pentecostal “high propensity” voters who stand as strong with Israel as they do for Trump and voted for him because Trump will stand for Israel.

Here is my point. If for any reason some war calamity happened that threatened the existence of Israel on Donald Trump’s presidency 20 million people will probably not turn out or be motivated to vote Republican. Israel at all costs must be protected and prospered or Republican political power is finished.

Trump will never have the majority Jewish liberal vote. Yes they all stand with Israel but they hate Trump. The bedrock for Trump’s important mid-term 2026 elections and ensure his legacy in the 2028 presidential elections is to make sure the Christian Zionist vote is secure.

And Israel is neither economically or socially or militarily secure enough for Trump to think he can avoid the possible threat from Iran, Hamas and Hezbollah to the future of Israel over the next 4 years. He must act now.

Something drastic needs to be done now about Iran. The upside for Trump? If he pulls this off plus manages to relocate Gazans to Egypt, West Bankers to Jordan, Middle East peace and prosperity, Abrahamic Accords restored between Israel, Jordan, Saudi’s, Egypt, UAE and massive economic development for Israel.....then he gets his Nobel Peace prize. If you see Trump hurrying to make peace with Russia you now know why. He cannot have Russia supporting Iran in the coming war. Message to Putin: Ditch your friend Iran and we America will once again be your friends.

If he fails and we get war between America/Israel and Iran and the whole Middle East blows up then it is time for a major change in evangelical eschatology.

But don't tear up your Bibles because the best is yet to come. There are times when God needs to shake things up to expose what is built on sand and what is built by God for His Kingdom.

In 70 AD Jesus came in the clouds of judgment at the battle of Armageddon and destroyed Jerusalem and with it the Messianic Zionism of the Jerusalem Church under the leadership of James looking for Jesus to return to set up a restored Jewish kingdom.

Don't be surprised if the Lord thinks He needs to once again shake the earth to get His Church out of the "end times" deception of Christian Zionism...and back to the mission of discipling the nations.
