## Madness as the Nations Approach their End Times

Have you noticed all the absolute craziness that the politicians are up to around the world? There is a strategic reason for this as well as a prophetic reason. The next four months will be hectic...

One of the favourite topics of discussion around here under the lockdown regime is "have you herd what they are now doing..." the "they" being our politicians and the "doing" are the many new and creative ways "they" are coming up with to destroy our economy, aggravate people with non-sense rules and the sheer hypocrisy of "rules for the but not for me".

As I keenly absorb the international news I am slightly comforted by the fact that our local politicians for once are not the only ones bent on destroying an economy, every other nation's political overlords seems to be afflicted by the same craziness.

I assume the commonality among the political class in destroying the middle class through shutting down the small and medium enterprises of the world is that they the politicians themselves have never started a business, have never been responsible for meeting a month end payroll from a struggling company that must provide a valuable product or service to survive. When you have a guaranteed job for life on the public payroll with all its attendant benefits, unavailable to the commoners on the street you are not much bothered by the consequences of your actions.

By this time however we are all beginning to realize we are in far bigger trouble than we ever thought possible. Never before in a pandemic of the past have the whole population been quarantined. Before it would be the sick and the vulnerable who are quarantined, everyone else goes about their business.

In past economic recessions or depressions standard economic theory says that there is a shortage of buying power from consumers so government stimulus can make up that shortfall. This is standard "Keynesian" economics. This time it's different...the politicians have not only destroyed income or consumer buying power, they have also shut down production. There are no products or services being produced or very little and no income from consumers to buy what is there. So the politicians say, "Don't worry, we will supply you with money in the meantime....and then when it is all over everyone can come out of lockdown and go back to work."

Except how many businesses are going to still be standing when lockdown ends? The printing of money cannot replace the destruction of "capital". Politicians do not understand that banks can print money, they cannot create capital. Actually to correct myself, I think the politicians in Zimbabwe now understand that nuance...last week they set in motion a desperate plan to try to get back the 4000 farmers they kicked off their land.

The business community and the people at home are starting to realize we are facing a manmade disaster of epic proportions. This week's Financial Mail cover story "**Apocalypse Just Now....Can South Africa's Economy Still be Saved?**" That question is being asked all over the world by other media commentators about other economies.

Here is my suspicion. There is something supernatural about this worldwide craziness infecting politicians. I will give you my reasons below. It is controversial because you will need to have a different view of prophetic times than what is now being preached.

### **The Nations Maneuvering for the End Game**

Let me move on to another level of crisis that is now becoming evident that is even more troubling....for this you need to read extensively in the world media and you need to read between the lines.

All significant nations have a section of their intelligence services doing projections decades out. All are doing sums and analysis about survival of their nation state. The usual time frame is 30 years from now 2050 the world population will add 2 billion more people (everyone knows earth populations is increasing by 130 million per year) and so you start your calculations: What is the world food, energy, water, minerals, resources looking like in 2050. Issues like deforestation, marine resources, debt levels, economic drivers, etc. These analysts provide policy prescriptions to whoever is in power.

All that changed this year with the Covid-19 crisis and the new economic reality this produced. Timelines have now shortened to where will we be in 2025 and who survives to make it to 2030 and who falls by the wayside in the coming world depression that is now unavoidable.

Read the world media and August 2020 is starting to look like August 1914. The nations are lining up for the clash that is coming and everyone has an objective and everyone needs allies and everyone has an enemy standing in the way of their objective to survive as a nation to get to 2030.

That is why the changed rhetoric from Trump regarding China. In January it was still "China is our friend, our partner". The plan was to take out China in his second term. Now a second term is looking not so certain. Failing politicians need distractions...like war. The nations are lining up in the coming clash, For America against China or for China against America. By the way this is not Trump's idea. This is Great Power politics. It is why Britain had to take out Germany in WW1. It was why America had to put a total oil and mineral embargo on Japan in 1938 etc. America and her allies absolutely cannot allow the great Eurasian landmass from Lisbon to Vladivostok to unite into the next global superpower. Trump is merely carrying out orders from what they like to call "the deep state" those who must outlive politicians and who must ensure their nation is still the world superpower in the 21st century.

Which also brings up the issue of Israel and the Middle East. As big a trouble that Donald Trump has regarding re-election so too has Netanyahu in Israel. He is facing criminal charges and riots in the streets. He knows and the Israel long term planners know this....Iran is an existential threat to Israel and a reckoning must come. This was supposed to wait till Trump's second term. Trump absolutely did not want another ME war when he faced re-election. He wanted a thriving economy, a second term and then do the hard stuff that needs to be done....China and Iran. The best time for war with Iran is while Trump is still President. A Democrat will not support Israel's war.

The "cold war" with China is long over, the hot war has already started around the peripheries. The same with Israel and Iran. Things have been mysteriously blowing up around Iran for months now. Don't even think that this huge bomb going off in Beirut was an "accident". Bombs don't go off by "accident" in the Middle East. The retaliation is soon coming and it will escalate.

Along the India/Pakistan/China border the armies are massing. There is a reckoning coming. Old enmities are surfacing and old scores need to be settled. Turkey is in Libya to secure an oil supply and Egypt is massing troops on the border. Japan has made all the components needed for atomic weapons as has Germany in fact Germany makes France's atomic weapons.

Which is why I said...the next 4 months are going to be momentous. Do you see nations and central banks doing the "spending like there is no tomorrow" routine? That used to be just a saying. Now it is a reality. There are major nations like Italy, Spain, Portugal, Greece who absolutely can no longer pay back any of their sovereign debts and they need the EU central bank to literally print up trillions of Euros to bail them out. Germany recently said "No more!". America is no longer making any pretence about 'fiscal discipline" they are now just printing it up by the trillions. China is doing it, Japan is doing it, soon South Africa will have to do it. Argentina has defaulted the third time in 10 years.

When all the governments of the world have abandoned traditional fiscal restraint and all are "spending like there is no tomorrow" then it is safe to assume their deep state analysts have determined there is a good chance there is no tomorrow or at least there is no America to pay back dollar debt or China to pay back those loans. Or an IMF headquarters or a functioning world economy that has regresses back to barter trade.

### **The Prophetic Significance of Politician Going Crazy**

As you read your Bible and re-read it through the years you eventually come across some apocalyptic verses where the Lord threatens the nations of the earth. Two good examples:

Hag 2:6 For thus saith the LORD of hosts; Yet once, it *is* a little while, and I will shake the heavens, and the earth, and the sea, and the dry *land*;

Hag 2:7 And I will shake all nations, and the desire of all nations shall come: and I will fill this house with glory, saith the LORD of hosts.

and from Hebrews:

Heb 12:26 Whose voice then shook the earth: but now he hath promised, saying, Yet once more I shake not the earth only, but also heaven.

**Heb 12:27 And this word, Yet once more, signifieth the removing of those things that are shaken, as of things that are made, that those things which cannot be shaken may remain.**

**Heb 12:28 Wherefore we receiving a kingdom which cannot be moved, let us have grace, whereby we may serve God acceptably with reverence and godly fear:**

**Heb 12:29 For our God is a consuming fire.**

If you go through the Biblical history of when the Lord shook the earth typically at a time when He wanted to do regime change and deliver His people, something always seemed to precede it: He made the rulers go mad and do stupid things.

- This happened to Nebuchadnezzar who went mad for 7 years.

- This happened to Pharaoh when it was time for Israel's departure....the Lord hardened his heart so that he refused to let the people go to serve the Lord meaning only more judgment and destruction on Egypt.

- It happened to Absalom when he overthrew his father David to seize the throne and then he lost it by following bad advice and rejecting the good advice given by Ahithophel. And the scripture says the Lord purposely closed his mind to good advice.

My point is....this world wide outbreak of political and economic stupidity that will result in the fall of nations and the destruction of economies is a fulfillment of Hebrews 12:26-28. It is time for the removal of tares that the enemy has sowed in the garden of God, so that the wheat can thrive and bring forth the harvest.

You see it is the wicked and their ways that get taken out...it is the righteous that are left behind to rebuild the waste places "Wherefore we receive a kingdom that cannot be moved...".

And that is why I want to encourage you at this most difficult time. God is on the throne. It is the time for a reckoning of the nations. The economic and political carnage you are witnessing, the violence in the streets, the looting...these are the collapsing of all that which was built on sand.

All that needs to be removed so that our lives and resources and future are not devoured by looting politicians and greedy corporates. This is not the "end times" you are hearing in sermons such as "Jesus is coming to take us out of here". These are the end times for all that is dead and dying in any case and that needs to be removed so that the Kingdom of God can grow to fill the earth.

**Isa 26:9 With my soul have I desired thee in the night; yea, with my spirit within me will I seek thee early: for when thy judgments are in the earth, the inhabitants of the world will learn righteousness.**

**Isa 26:20 Come, my people, enter thou into thy chambers, and shut thy doors about thee: hide thyself as it were for a little moment, until the indignation be overpast.**

**Isa 26:21 For, behold, the LORD cometh out of his place to punish the inhabitants of the earth for their iniquity:**
