Trump Election and the Global Shift in Power

With the landslide election of Trump in America a major shift in the world geopolitical, economic, social structures has taken place. And it is good news for the growth of the Kingdom of God in the earth. My analysis:

As South African I have as the Americans say “no horse in this race.” I have a personal opinion but let me rather attempt an analysis from a Kingdom Vision view.

I suggest you follow this analytic paradigm that I use....”What is Jesus doing as He calls us from the future to the future of a victorious church?”.

Always in your analysis keep uppermost that we have 2 Great Commissions from the Lord:

- 1) The Genesis 1:26-28 Commission to be productive and subdue the earth and multiply through the increase of families.
- 2) The Matthew 28:19 Commission of preach the gospel to all the world and increase the Church.

How do the new emerging world trends of a new Trump administration impact the world so we can have productive growing families and a growing world church of committed disciples. Meaning what does a new Trump administration for our Kingdom dominion mandate?

The basic requirement for both Commissions is what the heavenly host told the shepherds at the birth of Christ....”peace on earth and good will towards all men.”

My view of the election is that Trump and Harris were locked in a spiritual battle. Many, including myself, felt that the sparing of Trump’s life in the first assassination was an act of clear divine providence. For him to turn his head at that precise moment to avoid the assassin’s bullet, suffering only a grazed ear – it defies belief. I don’t believe in coincidences like that. Trump himself leaned into the religious overtones, understanding that many Christian supporters had come to see him as a messianic figure (I don’t). Personally, I do believe – and there are many examples of this in the Bible – that God selects certain individuals to carry out His plans on earth, and there is no doubt in my mind that Trump is one of those individuals.

Trump’s travails have been almost Job-like. Stripped of virtually everything, impeached, battered, humiliated, almost killed, slandered, de-platformed, sued, on the verge of being thrown in prison for the rest of his life, Trump found the strength to

mount a remarkable campaign and win. It is the greatest political comeback in American history. Many see his resilience as superhuman and divinely inspired

The Culture War

Now on the other side we have another religion, one I consider idolatrous, but a religion nonetheless. When you strip God from life, you don't leave people intact, but rather you leave them with a God-shaped hole. Today's left has eliminated (or corrupted) the Church, and in its place they have adopted secular religions .

The most important spiritual lens through which Harris should be understood is wokeism. Wokeism is in some ways similar to a religion that it has rituals, priests, and has the elements of original sin – whiteness, privilege, etc. Wokeism even has a millenarian bent in that it presumes that the world is fundamentally unjust and subject to vast oppressive hierarchies of the oppressors and the oppressed. There's no way for a straight white man (or anyone else near the top of the privilege hierarchy) to atone for their original sin. Or that America was founded on racism (the 1619 Project) rather than pilgrims seeking religious freedom.

The sacrifice in this cult is as always the children. Moloch demanded child sacrifice and so does the Woke cult. Wrapped in the Orwellian language of “a woman's right to choose”. Meaning the right to choose to kill her baby if the pregnancy comes at an inconvenient time. This is also euphemistically called a woman's “reproductive right” except the point is not to “reproduce”. And if they do manage to be born then there is the follow up strategy of “chemical castration”, gender confusion, and hyper-sexualization from early school age. And then as they age progress in school now comes boys in girls sports, and girls locker rooms and men in women's prisons.

This is demonic attack on the image of God in man, God's law order of parental rights, and the corruption of values based on God's law order.

The Trump electoral landslide was not only an Electoral College blowout but a popular vote victory of more than 5 million votes. Meaning a large percentage of minorities such as black men, Latinos, Asians had enough of “Wokeism”. This is a dramatic win for the evangelical church activists that mobilized a moral majority across all race groups and also convinced the silent church that the rapture is not about to save us before the nation falls apart.

This swing to the cultural right is now also starting to take root in a secular Europe at the polls. Watch for dramatic government changes coming.

The Media Wars

The legacy media that have been the “gatekeepers” of public debate forums and shaping national opinion is over. Newspapers and legacy TV are going economically extinct. The new forums of debate and information are podcasts through streaming. A week before the election Trump appeared on the Joe Rogan podcast. 48 million viewers. But he had to agree to the usual 3 hours conversation. He did it. Harris was invited to do the same. She said no only 45 minutes. Rogan said no. She could not

answer 3 hours of questions. People now want more than political slogans. Make your case under public debate and scrutiny.

This is great for the Christian culture war. We have a case to be made and we know how to present a case from a pulpit so the switch to long form podcast is easy.

Climate and Economy

The Trump economic agenda is going to make large changes to both America and the world economy. I predict Trump admin is out of COP 29. They will also get out of the “zero-carbon” no growth de-industrialization racket. Which is a cover for population destruction.

China, Russia, India and most of the global south are into economic growth. You cannot grow an economy without a growth in net energy use per capita per annum. You cannot build a modern industrial economy on wind mills and PV panels. And there are not enough rare earth minerals or new mines or new production of key inputs to make this transition. God gave us coal, oil, nuclear. And yes wind and sunshine but if you want a prosperous nation...use all the energy God gave us to use.

Trump policy is drill, drill, drill. America has vast reserves of coal, gas and oil. He is pro-coal. And just a question to ponder. When people talk about “fossil” fuels do you actually think there are dead dinosaurs beneath 10,000 feet of Arctic seas and earth crust? But there are billions of barrels of oil.

As there are billions of barrels of oil and gas along the coasts of Namibia and South Africa along with hundreds of billion of tonnes of coal in South Africa, Botswana, Mozambique.....we need a policy change out of “carbon-climate calamity” and into maximizing all our energy resources for rapid economic growth to alleviate the terrible poverty and unemployment of our people. That is how China took 800 million people out of abject poverty in 30 years.

Trump and War

Trump famously questioned what is NATO costing America and what does America get in return. Which was part of his question after invading Iraq did America get the oil as payment? No China got it. And like a businessman he wants to know what is war for? So he said no more foreign invasions.

He favors trade wars. As in Tariffs. His point is this...if you want the American consumer market then build your factory in America. There is no country in history that did not industrialize except through protective tariffs to protect their own industry and workers.

I expect him to continue this policy in his new administration. I expect trade and economic conflicts which are far better than armies and guns. It is not good business to shoot and kill prospective customers. Germany, Japan, Russia, China all have learned this lesson. They have also left their ideologies behind for home consumption. Economics beats war and ideology.

I expect Trump to get America and NATO out of the Ukraine debacle. That war must stop and human slaughter must be ended and the funding that keeps it going must be halted. It is time for negotiations and peace treaties. Trump says he can stop it very quickly. I hope he can.

This is good for family growth and peace for gospel and Church growth.

Trump, Kennedy and the Deep State

Trump has a visceral hatred for the vast intelligence bureaucracy of America which was a major player in trying to bring him down. That became obvious in the 2020 election when 51 senior intelligence officials signed a letter to say the Hunter Biden laptop was fake Russian disinformation. It has subsequently been proven to be real. And the information on it was a bombshell of Biden family involvement in corrupt money from Ukraine, China and other places which information would have destroyed the Biden presidential campaign of 2020.

Here is the interesting information on why Robert Kennedy Jr joined with Trump. Kennedy has two objectives:

- 1) He wants the records of his father and uncle's (John and Robert Kennedy) assassinations secret files to be publicly released. Trump promised in his 2016 campaign that he was going to release the secret Kennedy assassination file. He did not. When asked by his friend Judge Andrew Napolitano please release it you promised his response was "Andrew if you read what I read you wouldn't release it" Everyone knows why. The CIA was deeply involved in the assassination of John Kennedy. Robert Kennedy was assured this time he will release it. It will shock the nation and the world when he does.
- 2) Robert Kennedy has been a crusader for many years against the big food and Pharmaceutical corporations which he says are the cause of health crisis in America's young people. Especially the dramatic rise of autism in children. He wants to take on the Food and Drug Administration and the CDC (Center for Disease Control) and their bureaucracies....Fauci and the whole Covid tragedy needs to be exposed. Tump says he is going to do it.

Trump is going to give him a role in the administration so that he can take on these powerful interests.

He will especially use the revelations from the Kennedy assassination to shock the nation and give him the excuse of a massive overhaul of the CIA and the FBI. It is payback time and that is something that the Christian community should welcome.

We urgently need the same clean up here at home in our own secret services.

Trump and Elon Musk

Elon Musk played a very large role in the Trump electoral landslide. Money and personal time and effort and opening up X (Twitter) for debate and information. Musk also represents to Trump what his businessman instincts tell him. Get government out of the lives of people and the economy and let private enterprise

flourish. Musk has humiliated NASA and Boeing with his manned rocket breakthroughs.

Musk's international satellite system Starlink is revolutionizing the access to a global internet out of the reach of governments and their interference.

Musk knows all about how over regulations by government bureaucracies prevent innovation and growth. He has been beset in California by bureaucrats and decided to move to Texas. And he has had to fight the FAA for rocket launches. Trump has asked him to help with an overhaul of government bureaucracy.

This is a complaint all over the world and if Trump and Musk can show results it will cause a chain reaction in nations everywhere. Also of interest to me is how Musk behind the scenes has had private talks with other tech billionaires and getting them to either join the new Trump coalition or at least stay neutral and don't fight it. This has had an effect on Bezos and Amazon and Zuckerberg and Facebook already.

Summary for the Christian Church

The world power structures are shifting. The culture wars are being won. The world power struggles are shifting from guns and killing to economies and currencies. Ideological wars are waning. Everywhere this is good news for the growth of the church and the preaching of the gospel.

Technology and growing economies are good news. There is a lot still ahead. We need to be involved. We need to have new conversations on God's Kingdom principles for education, poverty relief, national governance, planetary ecology management for future generations.

We need to get out of "end times" pessimism and a renewed faith in our Lord and the inevitable victory of the Kingdom of God on earth and then act like winners with solutions.

Trump and Israel

One final warning. I don't trust the evangelical church in America and their theology of Christian Zionism. This can greatly affect how Trump handles the Israel situation. If he thinks God has divinely called him to save Israel this will be a disaster. Israel is under judgment and is in the process of national economic and social disintegration. Israel is a spiritual problem and a military intervention is not going to work. I hope and pray that his "no war" instincts prevail over his emotional ties to Israel.
