

Kingdom Vision Report

By: Orlando Mostert

For the week of:
30 December 2017

News Flash : Changes at Kingdom Vision Website Ministry

- Changes coming in 2018 to new website.
 - Changes to weekly blog.
-

Time to get organized here at Kingdom Vision!

The Lord has impressed upon me that from 2018 onwards there is coming an acceleration here on earth and in heaven. The Kingdom of God is visibly and invisibly in acceleration mode as are world events.

It means a number of changes that I need to make in presenting, reporting and teaching on the Kingdom vision. It means I need to get better organized to handle the open doors the Lord is giving us in this great season that lies ahead. I see this not only in the website teaching ministry market penetration but also in my business...the doors are opening to new opportunities for Kingdom expansion.

Website

I have instructed my website lady to start with a new design that organizes the various topics of the Kingdom vision for easy reference especially for new people coming onto the site. You will see the changes soon.

Weekly Blog

I am making changes here for 2018 and beyond. I am going to change to a newsletter format and post on the website as a PDF document. It means you can download onto your computer and read it at leisure when

you want. It will also allow you to easily send it to someone else as email attachment if there is an article in it that you think would be of interest to others.

Weekly Newsletter Content

There is so much happening these days that I need to expand the content. Not everything I report on will be of interest to everyone but I trust every week there is something new that will help you and your own work for His Kingdom. I want to start including things like:

Trends reports: There are important trends in the world today that I believe the church needs to be aware of. Call it the new "signs of the times". Things like demographics, world economic trends, energy, social trends, international power structures and geopolitics.

Good News reports: There are wonderful things happening in the world of science and technology for instance that we need to see as "tools for the Kingdom". The Lord is releasing a vast array of helps for us to push the Kingdom agenda and I would like to report to you regularly some of these advances so we can appropriate these things for His Kingdom.

Teachings: I want to broaden the scope of my teaching ministry to you. In the Kingdom vision I believe that all things must be reconciled to Christ. That means arts, science, music, philosophy, economy, business, government....That means not only new teachings and insights into scripture themes that we are familiar with but also new areas of life and culture that must be brought into the Kingdom of God.

News reports: I want to also bring to your attention important items of news happenings of the week that is happening in the church and the world that I believe impacts the Kingdom of God.

Kingdom Strategies: We are moving into a whole new era of God's dealings with His church and the world. It means that we need to plan for great increases ahead. It means new models for expressing church life and Kingdom realities need to be explored. It means new emphasis on new visions in the world marketplace as God raises up an army to possess all areas of life for His Kingdom. That will be the theme of my vision for a Second Reformation for the next 500 years!

Marketing:

I have not done any marketing of the website because I was still collecting my thoughts on the Kingdom of God through the years and getting it crystallized into a sound Biblically based new vision for the 21st century church. I am ready now to start a marketing campaign on social media and other media. But already my web counter shows that we have several thousand unique readers every week....but 2018 is going to be the year of acceleration to get the Kingdom vision out into the church

I want to encourage each of you to look to 2018 as a time of acceleration of your work for the Kingdom of God.

Be bold in what you do! The Lord is ready to do great and wonderful things. The vision of "Babylon Falling" will accelerate in 2018. But this is not a "fear" message. This is a message of opportunity of new doors and new spaces opening up for us as a church to fill the earth with the Kingdom of God. Go and possess your inheritance in 2018!

Trend Reports and News....

There was a lot happening at the end of the year world wide, both here in South Africa and around the world. Most of it I will leave for the new year. But I thought you might find interesting four items I picked up these last two weeks that are significant trends for the future:

- 1) The Church of England is dying out in Britain...
Time to evangelize Britain!
- 2) The Official UFO Disclosure—This last week something amazing happened. For the first time officials from the US Pentagon confirmed the existence of UFO's. And CNN and the NY Times and the Washington Post reported it!
- 3) Climate Change....Global Cooling!
There is something happening on the sun. Major problems coming....

Church of England Dying.....

I noticed these reports two weeks ago in the press out of the UK. What is the trend here and what does it mean? Here is the reality world wide:

There used to be something called “mainline Protestant churches”. Anglican, Methodist, Presbyterian, etc. They are all dying out. The only growing church movement in the world is evangelical charismatic churches. We are now the “mainline churches”. All others are declining into irrelevance. We will define in the years to come what is the Church of Jesus Christ, what is the mission of the Church and what constitutes the doctrines and teachings of Christianity.

Here are some of the items in the press reports:

A quarter of British rural parishes now have fewer than 10 regular members of the faithful on Sunday. There are no more children in 25% of the Church of England's congregations, as new figures have just shown . On average, nine children attended each church service across all Anglican churches in 2016. Generally speaking, churchgoers have dwindled in the UK by 34,000 in just one year.

“Should we care that Britain has lost its religion?” ", Daniel Finkelstein asked in *The Times*. Yes. He suggests that nationalism might take its place, but what if, instead, its place is taken by another religion? There is no need to be observant to understand the importance of a country's cultural affiliation. If there were no mass immigration from countries with values antithetical to Western ones, the demise of Christianity would not be as potentially calamitous; society might simply become one of atheists and secularists. Europe now, however, is experiencing a terminal decline for two reasons that are linked: mass un-vetted immigration coupled with a shrinking confidence in its own legitimacy and beliefs. There seems to be shame over Western colonialism, yet no thought at all seems to be given to who are the real colonists: The Crusades were a reaction to a Muslim colonization of the Christian Byzantine Empire, North Africa, the Middle East, much of Eastern Europe, Northern Cyprus and Spain.

In Europe, the UK is now leading the same process. Britain is living through “the biggest religious transition since the Reformation of the 16th Century”, according to Linda Woodhead, professor of the sociology of religion at Lancaster University. In 2000, Anglicans were 30% of the population. Half of them have disappeared in just seventeen years. The number of those who belong to the Church of England fell below 15%, including just 3% of English young people ages 18-24. Writing in the *Spectator*, Damian Thompson wondered if “the Church of England is dying”. ". Churchgoing dropped by 50% also in Scotland . Another report revealed that more than half the British population has no religion at all. According to internal documents from the Church of England, Christianity is dying in Britain at such a pace that in the next three decades, Anglican congregations will halve again.

What does this mean for the Kingdom of God?

Jesus said every tree that does not bear fruit...cut it down!

We are now moving into the era that everything that is built on sand and everything that does not bear fruit for the Kingdom of God will fall and wither away. Time to send missionaries to the UK and win that beautiful island for Jesus!

Official UFO Disclosure

This is a big one folks!. I have been following the UFO phenomenon ever since seeing a special TV documentary on a trip to America in 1988. I had never been exposed to it and my immediate reaction was....if this is true, then this is the kind of Satanic deception that can deceive the whole world.

Since then there have been many weirdo's and false reports and sensationalism on the topic but you always get the impression that there is more to this than what is being said by all the official denials. Everyone in the UFO movement has been wondering...when will an official from the US government finally just get up and say out loud to the world media..."UFO's are there, we don't know where they come from and we don't know what technology they are using but we are studying this phenomenon".

Well on 16th December it finally happened. The Pentagon official in charge of a secret study group made the announcement. What is very important here is that the so-called mainstream media reported it. On the same day you had the New York Times, the Washington Post, Politico, CNN, MSNBC...all reported it. That means it is now a subject for serious reporting and investigation.

I really recommend you view two Youtube news reports....

<https://www.youtube.com/watch?v=XaJR6h-41Nk> 12/26

<https://www.youtube.com/watch?v=QASC2fm---c&feature=youtu.be>

This topic is going to be confronted here at Kingdom Vision to prepare my readers for the major world deception that is coming. And here again I emphasize...everything that you have been told and read in popular prophecy preaching about "the antichrist" is wrong. There is a whole lot more that needs to be investigated here and this deception goes back thousands of years.

I will not make any further comments now...I just want to copy here a typical newspaper report on this major story that broke over the last 2 weeks in case you were not aware of this to get you up to speed for future investigations in our Kingdom Report....

From a UK news report....

Pentagon X-Files chief says UFOs DO exist and aliens may have visited earth from outer space

Luis Elizondo - former head of a secret £16million US government programme into extra-terrestrial life - claims the existence of UFOs has now been proven 'beyond reasonable doubt'

THE former chief of a secret US government programme claims UFOs really do exist. Luis Elizondo claims proof of their existence has been "proved beyond reasonable doubt" after heading a [secret £16million investigation into the existence of extraterrestrial life](#). Luis Elizondo has claimed the existence of UFO's has been 'proven beyond reasonable doubt'

Speaking to [The Telegraph](#) Elizondo said: "I think it's pretty clear this is not us, and it's not anyone else, so one has to ask where they're from.

"In my opinion, if this was a court of law, we have reached the point of 'beyond reasonable doubt'. I hate to use the term UFO but that's what we're looking at."

He said much of what he could discuss was still classified but said there had been "lots" of UFO sightings during the programme.

He was unable to comment on whether his team had examined sightings in other countries including the UK.

During the investigation geographical 'hot spots' emerged near nuclear facilities and power plants.

Since the revelation of the US government programme attention has been focused on footage of an unidentified object off San Diego, California, in 2004.

The Pentagon confirmed that audio and video of two US Navy pilots chasing an unidentified flying object near San Diego was investigated as part of the programme.

While not hostile in its manoeuvrability Elizondo claims the UFO sightings made onlookers conscious "something could happen."

Luis Elizondo oversaw the [Advanced Aerospace Threat Identification Program](#), which ran for five years between 2007 and 2012.

Footage, released in August, claims to show a [UFO](#) rotating while maintaining a "glowing aura".

The programme was set up by retired US Democratic Senator Harry Reid.

Most of the money for the programme went to an aerospace research company run by billionaire entrepreneur Robert Bigelow, who is currently working with NASA.

Since the existence of the secret programme was revealed attention has focused on footage of '2004 encounter' near San Diego, California

Mr Reid confirmed he set up the program, adding: "I'm not embarrassed or ashamed or sorry I got this thing going.

"I think it's one of the good things I did in my congressional service.

I've done something that no one has done before."

Last week [Pentagon officials acknowledged the existence of the programme](#) but insisted efforts had ceased in 2012.

Extract from the New York Times....

Glowing Auras and 'Black Money': The Pentagon's Mysterious U.F.O. Program

By [HELENE COOPER](#), [RALPH BLUMENTHAL](#) and LESLIE KEANDEC. 16, 2017

WASHINGTON — In the \$600 billion annual Defense Department budgets, the \$22 million spent on the Advanced Aerospace Threat Identification Program was almost impossible to find.

Which was how the Pentagon wanted it.

For years, the program investigated reports of unidentified flying objects, according to Defense Department officials, interviews with program participants and records obtained by The New York Times. It was run by a military intelligence official, Luis Elizondo, on the fifth floor of the Pentagon's C Ring, deep within the building's maze.

And the article goes on.....in America if the New York Times reports it...it is now open for all other news outlets to report on as real news.

Global Cooling

I have been doing some extensive research into the “climate change” debate. I have noticed that the wording has changed from the Al Gore days of “Inconvenient Truth” of “Global warming” to the more general term “climate change”.

There is a reason for this...

Scientists are not finding that global warming is not actually the issue or the major problem ahead. Temperatures have basically stabilized as far as warming trends are concerned. The big issue is now emerging....global cooling...which is far more dangerous for the future of food production, pandemics, earthquakes.

The conclusions come from researches into sun spot cycles dating back 400 years and the changes in weather associated with the energy output of the sun. Human carbon emissions have almost no major effect. The biggest effect on climate change is the energy output of the sun.

Here is the Kingdom Vision trend analysis in short....

If the cooling trend is true and confirmed for the near future then we are going to see huge impact on the grain growing regions of the Northern Hemisphere in the decade of the 2020's and world hunger and starvation and epidemics are going to be very real probabilities.

Here is a report by one scientist researching this....

The danger from the Global Warming crowd is that they are misleading the entire world and preventing us from what is dangerously unfolding that sparks the rapid decline in civilization – **GLOBAL COOLING**. I previously warned that this is not my opinion, but simply our computer. If it were really conscious it would be running to store to buy heating pads. This year will be **much colder** for Europe than the last three. It will also be cold in the USA. We are in a global cooling period and all the data we have in our computer system warns that the earth is turning cold not warm.

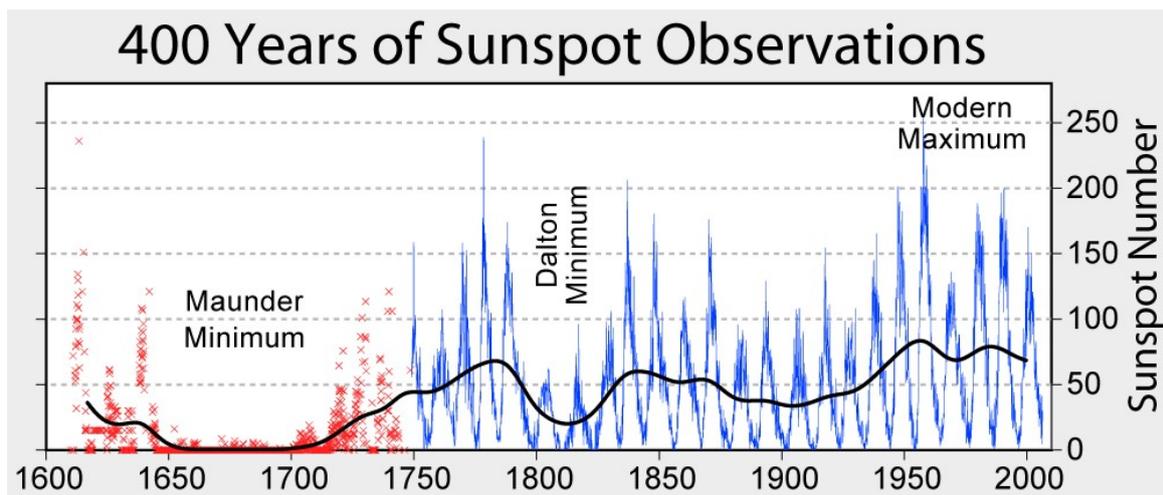

This cooling is very serious. This decline in the energy output of the sun will manifest in a commodity boom in agriculture as shortages send food prices higher. We will see famine begin to rise as crops fail and that will inspire disease and plagues. We will see the first peak in agricultural prices come probably around 2024 after the lows are established on this cycle. We have been warning that this rise would begin after 2017.

Previously, I have reported that NASA confirmed we are going into a cooling period – not warming. They have put out a forecast of declining sunspot activity. Now NASA has come out confirming what our computer has been forecasting. They have reported that as the sun is experiencing a rapid decline in sunspots, it is also dimming in brightness or energy output. NASA's Spaceweather station has recorded during 2017, 96 days (27%) of observing the sun have been completely absent of sunspots.

I have also previously warned that there is a 300 year cycle to this entire phenomenon. This cycle has aligned with the major turning point of the **Economic Confidence Model** 2015.75. During 2015, there were **ZERO** days observed without sunspots. The following year, 2016, came in with 9% of the days recorded without any sunspot activity. This jump to 27% here in 2017 is a substantial jump from 2015 that we cannot afford to ignore.

NASA launched a new sensor which is the International Space Station named TSIS-1. Its mission is to actually measure the dimming of the sun's irradiance. It will replace the aging SORCE spacecraft and NASA has confirmed our computer forecast that the number of sunspots in this cycle will fall rapidly as it plunges into a date with its 11-year cycle minimum. There was a sharp climate drop in 1916 creating a spike low in temperature. This 1916 spike low in our climate coincided with war and made this a devastating war aside from the poison gas. This was then combined with terrible **influenza** or **flu** pandemic of 1918 to 1919, which was the deadliest in modern history. This pandemic infected an estimated 500 million people worldwide or about one-third of the entire planet's population. It killed an estimated 20 to 50 million victims.

This pandemic began in the spring of 1917 and some sources point to troops in France as being the center of the pandemic. A significant precursor virus, harbored in birds, mutated to pigs that were kept near the front. Others place it with troops in Austria. Nevertheless, influenza ran from mid-1917, became noticeable by January 1918, and continued into December 1920. The unusually deadly influenza pandemic shortened the overall life expectancy by 12 years. This influenza killed the strong rather than the weak since it thrived on the overreaction of the body's immune system. The strong immune reactions of young adults fed the virus, whereas the weaker immune systems of children and middle-aged adults resulted in fewer deaths, which was very unusual.

Across the entire electromagnetic spectrum, the sun's output is declining. I personally hate cold. So this is not a forecast I want to see happen. Nevertheless, our computer has correlated this cooling trend with disease and it appears that famine also plays a role in this entire event. Additionally, a simple correlation with the energy output of the sun reveals that all major earthquakes occurred during strong solar minimums, which we are head smack into. Consequently, there were 7 major earthquakes of 8.0 magnitude moving into the turning point in 2008-2010. Kiril Islands (Russia) twice- 8.1 (November 2006 & January 2007), Peru-8.0 (August 2007), Sumatra-8.5 (September 2007), Sichuan earthquake-8.0 (May 2008), Samoa-8.1 (September 2009), Maule (Chile)-8.8 (February 2).

Folks this needs further research and watching...like Joseph in Egypt, if we know a food disaster lies ahead, then we need to prepare as a church for the coming world disruption.
