

Kingdom Report

Week of 31 March 2018

War and the Transition of the Age

Issue: There are important and dangerous developments in the world now unfolding that I want to analyse as "signs of the times" as we transition to the new age of the Feast of Tabernacles.

My basic premise here at Kingdom Vision is that we are in the "end times" of an epoch of God's Kingdom history and now transitioning into a great new age. The only idea that the current world of prophecy preaching and teaching has right is that we are in the "end times". I dispute the "end" of what and what follows afterward.

I am going to give you a quick update on very important recent developments that point to serious indications of collapse and war ahead as part of the coming world disruption as we move to God's Kingdom age.

Let me clarify however an important fact in the history of God's historical processes with man. His judgments in the earth are always redemptive. With the bad news is good news. I cannot in this short blog cover the good news of the many wonderful things happening that are going to be of great blessing for our transition and creating a new world order. That is part of future ongoing reports that I want to keep you informed of.

Right now with recent geo-political and economic developments I want to give you my Kingdom analysis of four dangerous trends now unfolding that you need to watch as they play out their part in this great "end times" drama. They are....

- The geo-politics of the "World Island"
- The quickening pace of the world economic warfare.
- The signs of the dying earth ecology
- The Christian Zionist/Israel Zionist alignment for the coming war.

The World Island Strategy: East vrs West

The great British strategist of the 19th century Harold Mackinder postulated the heart of world international strategy. "He who controls the World Island controls the world". The world island under this definition is the great Eurasian landmass of China (Asia), Russia and Europe. If this great landmass ever created one economic block they would rule the world.

That is why both Napoleon and Hitler invaded Russia. Why Britain fought the Crimean war against Russia, why British foreign policy towards Europe has always been "divide and conquer", why America keeps Europe under military control.

But the world island is coming together. Russia and China have united to form the great "Belt and Road" initiative that will use trillions of dollars of Chinese money and manpower to build an enormous infrastructure across the Eurasian landmass that will create great transport corridors for trade and energy. It will also include infrastructure investment in power stations, ports, airports, industrial parks in all the contiguous nations such as Pakistan, Vietnam, Kazakhstan, Russia, and all the way into eastern Europe and then branch into Iran and the Persian gulf nations.

This entire region of more than half the world population is entirely self-sufficient in energy, food production, technology, finances and military power. As this region integrates itself economically and politically the rest of the world becomes peripheral to their needs.

This is the coming conflict of East vrs. West. World power, the ability to control and shape the world destiny is shifting from West to East. And this was prophesied in scripture.

In Russia they have an ancient prophecy at the heart of the Russian Orthodox church called the "Third Rome" prophecy. Moscow is destined to be the Third Rome after the fall of Constantinople (the second Rome) which was the centre of the Orthodox church world empire of Byzantium....the prophetic anointing would shift to Moscow. That is why Putin's government has built or restored more than 25,000 Russian Orthodox churches.

If you want to know why the news is constantly about "Russia, Russia, Russia" it is because Russia is the centrepiece of the World Island strategy of China. Without Russia the whole World Island vision falls apart. War with Russia is now inevitable. It will start with a trade war and various provocations. That is how WW2 started with Japan. Japan was cut off from all supplies of oil in the 1930's to collapse the Japanese economy.

As usual Britain is playing its part with "Russian spy dossiers" against President Trump and Russian chemical attacks and many more dirty tricks coming.

Further war signs: President Trump started out in his Presidency with "lets get along with Russia, lets get out of all the useless wars in the Middle east." He was not

supposed to win the election. Hillary Clinton was the designated war President. But the endless media attacks on Trump with trumped up charges of 'Russian collusion' and threats of impeachment have given Trump the clear message...get on the agenda. So he has fired staff and appointed what amounts to a war cabinet of war hawks at secretary of state, CIA, national security advisor, defence department etc.

The Economic War

The economic war between east vrs west is full on. Recent developments that should be noted:

On 26 March China finally launched their "Petro Yuan" exchange in Shanghai. This is a direct attack on the American dollar as the world reserve currency. From an agreement back in the 1940's between America and Saudi Arabia all international trade in oil would be conducted in US dollars. If you want oil you need dollars.

With oil the largest traded commodity in the world the US dollar became the world trade currency. America could since then just print up trillions of dollars and buy whatever they need from anyone in the world. Everyone else had to earn dollars.

China is now in the process of breaking the international dollar hegemony. The petro-Yuan Shanghai exchange will allow trade in a special Chinese Yuan backed by gold. The oil producers of the Middle East are in as is Russia. You can pay for your oil in Yuan and those oil producers who accept Yuan can exchange their Yuan for gold guaranteed by China.

China and Russia have also developed their own international bank clearing system for international trade outside of the Brussels SWIFT system and apart from the Swiss Bank of International Settlements. They have attracted many other nations into this system by China making large Yuan deposits available in currency swaps with many nations and their Central Banks. This means counties that trade with Russia or China do not need to pay in dollars, they can pay in Yuan.

Russia is basically debt free with only \$122 billion of government debt. America has \$21 trillion of government debt and rising by more than \$1 trillion every year. China has the largest international reserves of American dollars and US government bonds. Who do you think is going to win this economic war?

The US congress did two things on the economic front these last two months that clearly indicate they have no long term economic plans...only an immediate economic war ahead.

They passed the biggest tax cut in history and they passed the biggest government spending bill last week. It was a 2300 page spending bill that no congressman read before passing it and which included an immediate \$80 billion extra for the Defence Department for war preparation.

All pretence by the Republican Party that they are the party of fiscal conservatism, balanced budgets etc has been thrown out the window and nobody in Congress even pretends anymore that America will ever be able to pay back the national debt or stop

multi-trillion dollar fiscal deficits for decades ahead. If America is spending like there is no tomorrow you need to ask why?

On top of that interests rates are going to rise dramatically in years ahead making cheap money a thing of the past and the interest bill on the debt unpayable. The same holds true for Europe. The ECB is now starting economic tightening under pressure from the Bundesbank and that means nations like Italy collapse economically under the weight of ever higher interest on debt...not to even speak of Greece, Spain or Portugal. The debt collapse of the European Union is in sight...which will help to explain the Why? of Brexit.

Which why the economic wars have started which inevitably in world history have lead to shooting wars....

The Dying Earth

There is so much to say about the condition of the world and planet ecology. But just a few thoughts here that international long view planners take into account. Here is a report headline from out of Europe this week....

"Three Quarters of Flying Insects in Germany have Vanished in 25 Years"

The abundance of flying insects has plunged by three-quarters over the past 25 years , according to a new study that has shocked scientists. Insects are an integral part of life on Earth as both pollinators and prey for other wildlife and it was known that some species such as butterflies were declining. But the newly revealed scale of the losses to all insects has prompted warnings that the world is "on course for ecological Armageddon", with profound impacts on human society.

To this you can add so many other things disappearing from the earth. The fish stocks will be depleted soon. The large mammals are disappearing, rhino's, elephants, the forests of the orangutans, the coral reefs, the bees, the groundwater levels, the great aquifers and you can go on and on.

The insects are dying from pesticides used for crop production increases. The great forests are being cut down for palm oil production. The seas are dying from plastic pollution.

And the insane idea of an economic system that must have endless growth on a finite planet otherwise the debt cannot be paid and the corporation executive bonuses cannot be paid

It is a world of ecological musical chairs and as the world ecology gets smaller and smaller and populations grow larger and larger the music will stop and certain nations and world powers are positioning themselves to be the inheritors of what is left of a dying earth.

Which is another reason why war is coming....

The Christian Zionist/Israel Zionist Alignment

In May President Trump must once again every 6 months declare Iran in compliance or not in compliance of the treaty on nuclear weapons. He has said he will not declare them to be in compliance. Iran will consider that to be an act of war.

The war against Iran is inevitable. John Bolton and Mike Pompeo the new additions to President Trump's war cabinet have both come out strongly in the past about a strike against Iran. Israel wants to bomb Iran but they need American support.

Deep within the American and Israeli government are true believers in the prophetic destiny of Israel. When scripture says "The law shall go forth from Zion" they believe in their hearts that God has chosen the Israeli state and Jerusalem to be the centre of God's government on earth.

The evangelical church believes this and both Mike Pence the Vice President and Pompeo the secretary of state are very strong evangelical Christians. They believe that God plus America plus Israel have a divine destiny. God will ensure a mighty victory. The generals around President Trump also for different reasons believe in the coming war victory. They have lined up a Sunni alliance of Saudi Arabia and Egypt with Israel for the coming war.

We are going to witness I believe a tragic re-enactment of Jerusalem 70 AD. The Jerusalem church of 33 AD-70 AD was led not by the apostles of Christ but by the family of Jesus...first his brother James, then his cousin Simeon (after James's death in 62 AD), then His other brother Jude. Why? Because the Jerusalem church believed that the messiah was soon to return and defeat the enemies of Israel (Rome) and set up a world government in Jerusalem restoring the throne of David...which is why the Davidic descendants of the family of Jesus were the leaders.

And that was the essence of the battle between Paul and the Jerusalem church and the battle in the churches as to who is the real Israel and who will rule the nations.

The evangelical church will replay the great eschatological error of 70 AD. The more than a million Jews who tragically died in Jerusalem in 70 AD contained many thousands of the church of Jerusalem who had preached to everyone that the Messiah was coming soon in the clouds to defeat the enemies of Israel and set up His kingdom in Jerusalem.

Donald Trump's son-in-law Jared Kushner is an orthodox observant Jew. He is responsible for Middle East negotiations. He believes in the prophetic destiny of Israel as does the Israeli government as does the key figures in the American administration as does the major figures in both the Democratic and Republican parties.

And that is also why war is coming.....
